Software Engineer | Full-Stack Developer

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of industry experience and an M.S. in Computer Science from Sacred Heart University, USA (GPA 3.92/4.0) — shipped products serving 10,000+ users in production. Expertise in full-stack development, ML pipelines, and data engineering. Currently exploring LLM integration and AI-powered tooling for enterprise applications targeting roles at the intersection of full-stack engineering and applied AI in Mumbai.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, SQL, Java, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS, Redux, Pandas, NumPy, XGBoost, Streamlit

Databases & Cloud: PostgreSQL, Firebase, Supabase, MongoDB | AWS, GCP, Azure, Docker, CI/CD, Linux/UNIX

Data & Analytics: Power BI, Tableau, BigQuery, Statistical Analysis, EDA, Feature Engineering, Time Series

Tools & Protocols: Git, REST APIs, TCP/IP, Network Monitoring, Google Analytics, Firebase Auth

PROFESSIONAL EXPERIENCE

Research & Data Analysis Assistant

Sacred Heart University | Fairfield, CT | Jul 2025 – March 2026

- Cleaned and managed student datasets (5,000+ records) achieving 98%+ data accuracy for key institutional decisions.
- Engineered Power BI and Excel dashboards visualising student success metrics and post-graduation outcomes across 4+ departments, adopted for AACSB accreditation reporting.
- Partnered with VP-level stakeholders and faculty to translate data insights into actionable advising strategies, cutting data-to-decision lag by 40%.

Freelance Web Developer

Self Employed | Mumbai, India | Nov 2022 – Nov 2024

- Designed and developed custom websites and web applications for clients across e-commerce, services, and retail sectors.
- Managed end-to-end project delivery, client requirements, UI/UX design, development, and deployment.
- Built and maintained client projects using React, Next.js, Firebase, and Tailwind CSS.
- Delivered projects independently, managing timelines, revisions, and client communication across multiple concurrent engagements.

Software Engineer

Dhwani Aurica Pvt. Ltd. | Mumbai, India | Sept 2020 – Oct 2022

- Built and shipped a full-featured e-commerce platform (React, Firebase, REST APIs) with payment gateway integration, inventory management, and real-time order tracking, boosting digital sales by 25%.
- Led end-to-end development of a telemedicine application serving 10,000+ active patients secure login, appointment booking, and medical report sharing via Firebase Auth and Realtime DB.
- Reduced API response latency by 30% through query optimisation, indexed PostgreSQL schemas, and caching strategies on a high-traffic patient data service.
- Partnered with cross-functional non-tech teams to convert business requirements into production-grade deployable features across 3 major release cycles.

Software Engineer Intern

Dhwani Aurica Pvt. Ltd. | Mumbai, India | Mar 2020 – Sept 2020

- Assisted in developing and testing front-end components using React and JavaScript under senior engineer guidance.
- Contributed to bug fixes, code reviews, and feature development across the e-commerce platform codebase.
- Gained hands-on experience with Firebase, REST APIs, and agile development workflows.

KEY PROJECTS

MedRisk AI — Healthcare Risk Management System

Next.js, Python, NLP, PostgreSQL

Full-stack clinical platform featuring Patient Management Dashboard, Alert Centre System, AI-powered Note Analyzer (NLP), and Patient Onboarding. Designed for real-time patient risk stratification and clinical decision support. Explored LLM integration for automated clinical note analysis and risk flag extraction using OpenAI API.

NLP Text Summarization Research

Python, BERT, BART, T5, PEGASUS, TF-IDF, TextRank

Benchmarked 6 extractive and abstractive NLP models on CNN/Daily Mail dataset. Extractive methods (TF-IDF, TextRank) outperformed abstractive (BERT, T5) by ~21.6% on ROUGE scores published as IEEE-formatted research paper.

Predictive Maintenance ML
Python, XGBoost, Streamlit, Pandas, Matplotlib | github.com/niharwani/predictive_maintenance
ML solution forecasting Remaining Useful Life (RUL) of industrial machines using NASA CMAPSS sensor data. Deployed on Streamlit Cloud with real-time health alerts and interactive visualization dashboards.

NetWatch — Real-Time Network Monitoring Dashboard
Next.js 14, TypeScript, Tailwind CSS, Vercel | netwatchbynihar.vercel.app | github.com/niharwani/NetWatch
Serverless network diagnostics dashboard with live ping, port scanning, TCP/HTTP connectivity tests, DNS resolution, and intelligent latency/packet-loss alerting. Deployed on Vercel with zero-downtime CI/CD pipeline.

FinTrack — Personal Finance Portfolio Manager
Next.js, Supabase, Firebase, Finnhub API, Tailwind CSS | fintrack-by-nihar.vercel.app | github.com/niharwani/fintrack
Real-time stock tracking and portfolio management web app with custom screener, Google/Email OAuth, Recharts-powered asset allocation dashboards, and live Finnhub market data integration.

Time Series Data Visualization
Python, Pandas, Matplotlib, Statsmodels | github.com/niharwani/TimeSeriesProject
Analytical tool for time series decomposition, trend analysis, and forecasting. Extracts actionable insights from temporal datasets using statistical modelling built for data-driven decision making.

EDUCATION

M.S. Computer Science & Information Technology
Sacred Heart University, Fairfield, USA | March 2026 | GPA: 3.92/4.0

Bachelor of Computer Applications (BCA)
Amity University, Noida, India | Apr 2024 | GPA: 3.56/4.0

CERTIFICATIONS

- Google Analytics Certification — Google Digital Academy, Nov 2025
- AWS Knowledge: Cloud Essentials — Amazon Web Services, May 2025
- Docker Foundations Professional Certificate — Docker, Inc., Mar 2025
- Career Essentials in Data Analysis — Microsoft & LinkedIn, Feb 2025
- Capstone: Retrieving, Processing and Visualising Data with Python — Coursera, Apr 2023
- Using Python to Access Web Data — Coursera, Apr 2023
- Python Data Structures — Coursera, Feb 2022
