PROFESSIONAL SUMMARY

Computer Science postgraduate (M.S., Sacred Heart University, GPA 3.92/4.0) with 3+ years of experience across data engineering, software development, and analytics. Currently a Data Management Specialist (Data Engineer) at Acies LLP, building Python, Polars, and SQL-based ETL pipelines and data processing solutions for financial services clients, including Aditya Birla Capital, InCred, Credila, Toyota Financial Services, and Al Ahli Bank of Kuwait. Previously built transaction and inventory data pipelines for an e-commerce platform that supported a 25% increase in digital sales, and data pipelines for a telemedicine platform serving 10,000+ patients. Enjoys solving complex data problems and building solutions that translate into measurable business value.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java
Data Processing: Polars, Pandas, NumPy, PySpark, data validation & reconciliation, schema design, time series analysis
ETL & Orchestration: Apache Airflow, Apache NiFi, Apache Kafka, Talend Open Studio, Microsoft SSIS, Fivetran, SFTP integrations
Databases & Warehouses: PostgreSQL, MySQL, MongoDB, BigQuery, AWS Redshift, Firebase, Supabase, Redis
Cloud & DevOps: AWS (S3, Glue, Lambda), GCP, Azure Data Factory, Docker, Git, CI/CD, Linux/UNIX
Analytics & BI: Business analytics, Power BI, Tableau, Excel automation (OpenPyXL), EDA, statistical analysis, feature engineering
Software Engineering: REST APIs, Flask, Streamlit, React, Next.js, Node.js, API security testing (HMAC, CSRF, IDOR)
ML / Other: XGBoost, NLP (BERT, BART, T5)

PROFESSIONAL EXPERIENCE

Data Management Specialist (Data Engineer) **May 2026 – Present**
Acies LLP *Mumbai, India*

- **Client exposure (BFSI & telecom):** Aditya Birla Capital, Aditya Birla Housing Finance Limited, InCred, Credila, Avanse Finance Limited, Toyota Financial Services, Utkarsh Small Finance Bank, Al Ahli Bank of Kuwait, and Omantel Telecommunications Limited.
- **Aditya Birla Capital Limited (ABCL) – IFRS 9 ECL POC:** Developed the end-to-end data ETL for ABCL's Expected Credit Loss proof of concept, building Exposure, Counterparty, and Collateral ETLs (Python, Polars, SQL) that ingested and transformed raw data from 5+ upstream source systems into the desired ECL-ready output.
- Implemented IRAC DPD (days-past-due) business rules, staging classification, product/portfolio master mappings, and multi-sheet segmental data reads; resolved a leading-zero data-loss defect in account-level joins.
- Built reconciliation and validation scripts comparing pipeline output against cloud runs and the client's reference ECL file to deliver regulatory-grade data quality, and authored the client-facing ETL delivery report.
- Developed and hardened an IFRS 16 lease accounting engine generating automated journal entries, lease liability schedules, and disclosure tables, including modification handling, security deposit accounting, and prior-year comparatives.
- Debugged and enhanced a Flask-based model methodology application (Redis caching, download endpoints, XSS input validation) and conducted API security testing (HMAC, CSRF, IDOR) with documented QA reports.

Research & Data Analysis Assistant **Jul 2025 – Mar 2026**
Sacred Heart University *Fairfield, CT, USA*

- Designed and automated ETL pipelines (Python, SQL) to clean, validate, and consolidate 5,000+ student records across disparate institutional systems, achieving 98%+ data accuracy for AACSB accreditation reporting.
- Built Power BI and Excel pipelines transforming raw departmental data into dashboards adopted by 4+ departments, reducing data-to-decision lag by 40%.
- Partnered with VP-level stakeholders to define transformation rules and standardise schemas, enabling consistent reporting across student success and career outcomes datasets.

Software Engineer **Sep 2020 – Oct 2022**
Dhwani Aurica Pvt. Ltd. *Mumbai, India*

- **E-commerce:** Architected ETL workflows loading transaction and inventory data from a high-traffic e-commerce platform into a PostgreSQL warehouse, enabling real-time order tracking and sales/inventory analytics that supported a **25% increase in digital sales**.
- **Healthcare:** Built data pipelines for a telemedicine platform serving 10,000+ active patients, automating extraction of appointment, patient, and medical report data from Firebase Realtime DB into structured schemas for analytics and compliance.
- Reduced API response latency by 30% via query optimisation, indexed schemas, and caching on a high-volume patient data service processing thousands of daily transactions.

- Joined as an intern (Mar–Sep 2020) and converted to full-time after supporting front-end development and REST API data-flow testing.

KEY PROJECTS

ETL Data Consolidation — Healthcare Clinic CRM *Python, Pandas, OpenPyXL, SQL, Power BI*

- Consolidated 25+ years of patient and sales records from dozens of disparate files into a master database (30,000+ unique records, 11 sheets) with automated deduplication, schema standardisation, and a summary dashboard.

Predictive Maintenance ML Pipeline *Python, XGBoost, Streamlit, Pandas*

- Engineered an ML pipeline ingesting NASA CMAPSS sensor data, transforming multivariate time series into features, and serving predictions via a Streamlit dashboard with real-time health alerts.

MedRisk AI — Healthcare Risk Platform *Next.js, Python, NLP, PostgreSQL, OpenAI API*

- Full-stack clinical platform with multi-source data ingestion, NLP-powered note analysis, and a patient risk stratification pipeline loading structured outputs into PostgreSQL.

NLP Text Summarisation Research *Python, BERT, BART, T5, PEGASUS, TextRank*

- Benchmarked 6 extractive and abstractive models on the CNN/Daily Mail dataset; extractive methods outperformed abstractive by ~21.6% on ROUGE. Published as an IEEE-formatted research paper.

EDUCATION

M.S. Computer Science & Information Technology — GPA 3.92/4.0 **Mar 2026**
Sacred Heart University *Fairfield, CT, USA*

Bachelor of Computer Applications (BCA) — GPA 3.56/4.0 **Apr 2024**
Amity University *Noida, India*

CERTIFICATIONS

- Google Analytics Certification — Google Digital Academy (Nov 2025)
- AWS Knowledge: Cloud Essentials — Amazon Web Services (May 2025)
- Docker Foundations Professional Certificate — Docker, Inc. (Mar 2025)
- Career Essentials in Data Analysis — Microsoft & LinkedIn (Feb 2025)
